Don't Let Productivity Suffer Due To A Poorly Built Network!

Did You Know?

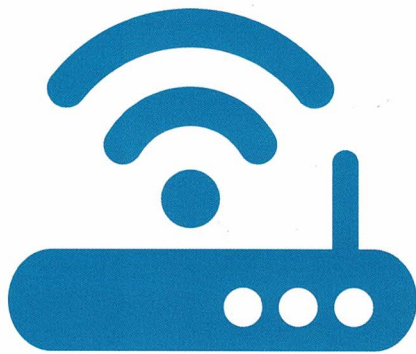

Many Networks Operating Today Are Constructed of Out dated & Slower Performing Data Cables, Or Were Installed Using Low/Poor Quality Materials & Craftsmanship. This Can Greatly Impact & Slow Performance Preventing Users From Getting the Most Out of Services They Pay For.

NextG performs Network Audits & Certification. We Will Identify, Repair or Replace Those Broken Down Outdated Cables. Our Service Includes Complete Documentation & Labeling. Plus, Once We Certify Your Network Cables We Guarantee* Them To Work Worry Free for 5 Years.

*Certain conditions & restrictions apply

Do You Have Troubled Areas On Your Wireless Network?

By adding Wireless Access Points also known as WAP's NextG Communications can greatly increase your WiFi's coverage area. If you have to change locations to get faster download speeds because of weak spots in your wireless network, we can help. In many cases and usually over the phone by answering a few simple questions, we can determine if a WAP is right for you.

Call Us Today to see if installing WAP's will benefit your Business
